OPERATION OF NURSERY IS IMPORTANT

Beijing, Chinese Home Service, 11 Nov. 1958, 230 GMT--  
(Text) The CHINA YOUTH DAILY of 11 Nov. reports on its front page  
good results of operating of the kind people's work  
and carries an editorial entitled "The Party, We Praise to  
the Good Care of the Children."

It is a communist ideal to put children under communal education as soon  
as they can be separated from their mothers. But how can we realize  
this ideal? The party has pointed out the direction to us--that is,  
children's education should develop in the direction of socialism.

The development of children's education in the direction of socialism is  
a manifestation of communist ideology. The successful operation of  
nurseries and creches is a very important task. It is part and parcel  
of our long-range plan to mold children into new men imbued with communist  
ideology. At present, it is (possible for us?) to make this new  
undertaking a success. A large number of youth have already participated  
in children's health and welfare work in response to the call of the  
party. This is a laudable action. Since they have assumed this task  
entrusted to them by the party, they must see that it is carried out  
with success.
